

# DELIVERY INFORMATION PACK

SSEN Connections

Scottish & Southern  
Electricity Networks

# INFORMATION AVAILABLE TO YOU

Once you have been issued your quotation and you have accepted it, the project will move into the delivery phase. SSEN, or your appointed Independent Connection Provider (ICP) or Independent Distribution Network Operator (IDNO), will then undertake the on site and/or off site works required to connect and energise your site/premises.

Although this is the last stage in your connections journey, there are still things you need to be aware of such as wayleaves, land rights and preparing your site for SSEN to attend and make the final connection.

## Wayleaves & Land Rights

We may need to cross third party land to facilitate your connection

## Mailing List

Subscribe to our Mailing List to be kept up to date and receive invitations

## Connections Meetings

Book a meeting to discuss your pre-application requirements or progress of an existing project

## Safety

Browse our extensive safety advice

## Videos

Visit our YouTube channel for videos and recorded webinars

## Events and Webinars

Visit our event calendar to register for a variety of engagement opportunities

## Contact Guides

Unsure who you need to speak to? See our contact guides

## Refunds

Information on our refunds policy

## Requotes

What happens if a change is required to your Connection Offer

## Building Network Operator

Information on the electricity distribution network within a multiple occupancy building

## Improvements & Commitments

Find out what improvements we're working on and how to get involved

## G81

Our library of technical specification and standards

# INFORMATION AVAILABLE TO YOU

## **Performance, Standards & Charges**

## **Queue Management**

The queue of accepted connection offers not yet connected

## **Interactivity**

When the validity of one quotation is dependent on the outcome of another

## **Meter Point Administration Number**

You'll need an MPAN to arrange your metering

## **Site Readiness (small)**

Guidance on preparing your site for a small connection

## **Site Readiness (large)**

Guidance on preparing your site for a large connection

## **Joint Operational Agreements**

Find out more about JOAs and Site Responsibility Schedules
